

# THE NON CONFLICT

## DEFINITION:

My Muses had deal it's method with me gently,  
As them, the non conflict stands not with men.

These is theory for deriving from restrictions,  
Sistematic finding to proceed without conflict.

Their precise science to avoid war.

A corpus of law as the enviroment restrictions;  
Lies with it on the machinary a way to justice.

Non confclit —share on finding a divine language;  
Precise logic is on base orthogonal realm for ideas.

One derive to find options; to optimize is to chose.  
To proceed with no conflict one must precise  $r \forall 3$ : (r.1) rules to an enviroment of events,  
(r.3) rules to declare and restrict the optimizing functional. To restrict on (r.1)  
is to describe the current estimated state of the enviroment, (r.2) is to the non  
conflict convolution operation, and to (r.3) is to make the law. —Our Muses  
holds for them self some knowledge to precise on the non conflict method the  
realm, confused we lie to know it optimized findings be now. Our laws first to  
be cleared and to be optimized functionaly; on beeing confused by language lies  
why non conflict stands not with men, as we long know to use non-orthogonal  
languages to define the optimized chosing of action. We must see we fail to  
extensive precise non physical equations.

## HUMANLY RESTRICTIONS:

As the current state of science, the optimization inference mechanism for chosing can and is to be made  
automatic. The method  $r \forall 3$  is then only as good as the restrictions are to precise the situation. Is common  
to confuse uncertainty to those problemns where the restrictions where just variable, and to hope is not done  
on a excesive correlative manner. The science that lies with it will then solve law to be just one equation.  
For now is to me to sare this and hide a lattent extend, to me be just the human of these Muses; for me to  
craft a science not a solution. —is either not to lie me up to rule down the optimized; must it be instead my  
lifetime a persuit for a procedure to fiding practical shapes to the one vector field (or real) for ideas. —does  
not seem like it, to *peace* is to find the realm of ideas. —With respect, is it much like the english metric  
system that the word on “peace” implies ‘portion’ and the word on “lies” implies ‘non-truth’ rather than  
‘foundational-base’ —it seems to me near, peace lies on sharing infinite trading values.

## CALCULATING ALL POSSIBLE PROCEDURES:

‘The non conflict’ needs one best language to dialog best law, and to perform the best negotiation. —one  
might apporach as me the Muse’s non conflict, by discriminating over non superposed optimization measures  
by the ruling restrictions (r.3), over all trayectories that minimize the conflict convolution (r.2) applied in the  
enviroment (r.1). Defined in the ream of the legal corpus readed to be understood as maximizing entropy over  
the vectorspace certainty based on propositional calculus logic pragmatic sequence functional field for ideas.

## RESTRICTIVE ENTROPY INFINITE CONVOLUTION:

Is to define all the without nor or minimal conflict trayectory action sequences.

## WITHOUT CONFLICT INTERFACE TO REALITY:

Weaked prescript ruling duty,  
Seek to track reality interface;  
Otherwise power senses crazy.

Build practic personal fortunes.  
No non conflict to finite persuit.  
Power needs not finite. Lie not deceived to entrust resources to grasp  
limited, there lies war.

Waajacu’ll many infinite values,  
Science then map math to ideas.  
To be no conflict on ruling duty.
